Howard M. Austin, Editor

Official Announcement: Annual FLG Meeting August 7, 2004 9am Glenville CDC

Lake Glenville Clean-Up Day Saturday June 12, 2004 Clean-up Information

Lake Clean-Up this year is set for Saturday, June 12th from 8:00am to 1pm. We look forward to a great turnout to keep our Lake the most beautiful in the United States. Please come out and enjoy a morning of fun with all the other boats and then join us for lunch at the Pavilion at Buck Knob Landing. Our thanks to Tom and Susan Turner for donating the use of the Pavilion, to Mountain Party Tents and Events for donating the use of the tables and chairs for the lunch, and to Trillium for providing personnel to help with the debris removal. Food and beverages will be provided by Friends of Lake Glenville.

Time and Place

From 8:00 a.m. to 1 p.m. on Saturday, June 12. Let's begin collecting trash at the first collection point (Hurricane Creek area—see below) at 8:00 am. Be sure that you have your survey flags for flagging floating obstacles that are too large to load onto your boat.

Overall Plan

This is a little different from last year. Duke is providing a barge for the removal of all debris that can be loaded onto your boats. This barge will be located at specific locations at or near the shoreline at various times during the morning (see below.) Boat owners may do one of two things:

1. Collect debris (see below for a description of what may be collected) around your own shoreline and take it to the ramp on Pine Creek Road where there will be help to remove it.

(Continued on page 4)

Relicensing Legal Fund Kick-off a Win-Win

FLG members attending the May breakfast at The Landings at Trillium enthusiastically and generously participated in the launch of our Relicensing Legal Fund campaign with contributions totaling over \$2,100. Relicensing Fund Steering Committee member Carol Adams recognized Steering Committee members in attendance and reported on the procedures for the campaign, noting that solicitation letters would be mailed about May 15th to all members and others in the community. Breakfast attendees were provided with a copy of the solicitation letter and a summary of the legal progress thus far.

Helen Cook, also a steering committee member, conducted the breakfast's contribution launch where contributors at the breakfast selected and then popped a balloon that contained a ticket to choose one of the many prizes available that day. Prizes included bottles of fine wine, home decorative items and various books. With balloons popping throughout the room, it was apparent to all that members generously responded with cash and checks easily increasing the fund from the present \$10,000 level well toward the \$15,000 level and another notch up to our \$50,000 goal.

Cook announced the overall *Win-Win* feature of the fund raising campaign which is a drawing at the conclusion of the direct solicitation campaign phase for two different prizes valued at over \$500. Cook and her business partner David Caples, owners of Amelia Island Florida properties *Elizabeth Point Lodge*, a bed and breakfast, and *Katy's Light*, a 3 bedroom oceanfront lighthouse replica accommo-

(Continued on page 6)

May!...Oh My! The President's Message

Each year, in May, it appears as if *Friends of Lake Glenville* activities are just getting underway. Our first Member Breakfast takes place in May, and most members begin to trickle into town sometime during the month. But the idea that our activities are just beginning is a perception, not reality. Actually, behind the scenes and throughout the winter, board members, committees and their members have been accomplishing many tasks. Here is an update for you.

Officer/Committee	Activity	Status
President, Carol Adams	Represented FLG at public hearings concerning the Mountain Top Development and Duke's proposed dock restrictions; Attended two North American Lake Management Society conferences on water quality.	As result of public input NCDWQ required Mtn. Top to make additional water protection improvements; Duke dock restrictions are pending as of this writing.
Treasurer Joanne Lindquist	Arranged for Visa/MasterCard payment options; Obtained our 501C3 designation application and worked with the BOD to complete; Sent dues notices	Members my charge dues, contributions and logo item purchases. 501C3 application has been sent to the IRS; 200 + have paid dues.
Relicensing Doug Odell	Guided our Duke Relicensing Application intervention strategy with our legal counsel and our team of stakeholders.	Our first intervention document, filed with FERC on March 26th, called for further studies by Duke.
Relicensing Fund Carol Adams, Howard Austin, Helen Cook	Developed plans for a \$50,000 Relicensing Legal Fund campaign launched in May; Formed the Fund Steering Committee and created all Fund materials	The Fund solicitation letter has been sent to members and other community residents and leaders.
Lake Clean-up/ Boating Safety David Leach	Organized all elements of the June 12th Lake Clean-up working closely with Dale Mosteller, Duke Lake Manager.	Newspaper advertising and articles will promote the clean-up. A post clean-up lunch with door prizes is planned.
Water Quality Testing/ Streams Bill Lindquist, Sam Lupus, Jan Brand, Robt Luck	Gathered samples from incoming streams every month; Delivered the monthly samples to the Asheville UNC-Asheville Testing Lab. Sandy Bishop assumes the BOD position to head the water quality committee filling the vacancy after Keith Dixon's resignation due to responsibilities in building a new lake home	Test results show continued high quality in all categories. Our funding grant from UNC-Asheville has been approved for three more years.
Water Quality Testing/Lake Don Hansen	Directed the purchase of lake water testing equipment; Developed the testing program for lake water quality. Conducts our lake water testing activities	Lake testing results will be added to incoming stream results to provide a more complete picture.
Communications Howard Austin	Sent all email announcements; "Tuned-up" the FLG website; Published and mailed newsletters	Our website and newsletters continue to be important sources of information to current and prospective members.
Social DeeDee Rietze	Made arrangements for all breakfast events before resigning due to family responsibilities. Dottie Ennis assumes the Social Chair vacancy.	Breakfasts are scheduled for the third Saturday of each month, 9AM at Trillium, The Landings.
Logo Clothing Patti Hampton, Karen Scarborough	Completed a clothing inventory for sale and placed new item orders	All items will be available for sale at the monthly breakfasts and the annual meeting on August 7.

The Relicensing process is continuing. Duke submitted their Application for Relicensing of the West Fork Project No. 2686, East Fork Project No. 2698FLG and the Nantahala Project No.26922 in late January. The FERC sent out the Notice of Receipt which was an opportunity to identify issues that should receive additional study. FLG submitted a request for study of the economic basis for spending \$100,000 to build a trail down from the top of the Glenville Dam to the gorge for the small population of class 4 or 5 kayakers vs the benefits to many using Andrews Park. The intent to intervene for nuisance control was also communicated.

While finishing our first official submission to the FERC, we had a change in legal support. Mike Butler, with our approval, asked Philip Marston of Washington, DC to assist. We are paying legal time for only one attorney. Mike became swamped in litigation activity when we were racing a document submission cut-off date. It was a smooth hand off and Phillip did an outstanding job

picking up our activity at the last minute. Phillip has worked at the FERC.

The preliminary intervention and the request for study was filled, on time, with the FERC. The preliminary was to alert FERC that an intervention would be coming later in the schedule. The request for study places a request on Duke to do an economic justification for funding of the Glenville Gorge Kayakers request for trail funds. The next stage in the process will be to comment on the Duke Application. This will include our statement of Intervention and will probably occur during late summer.

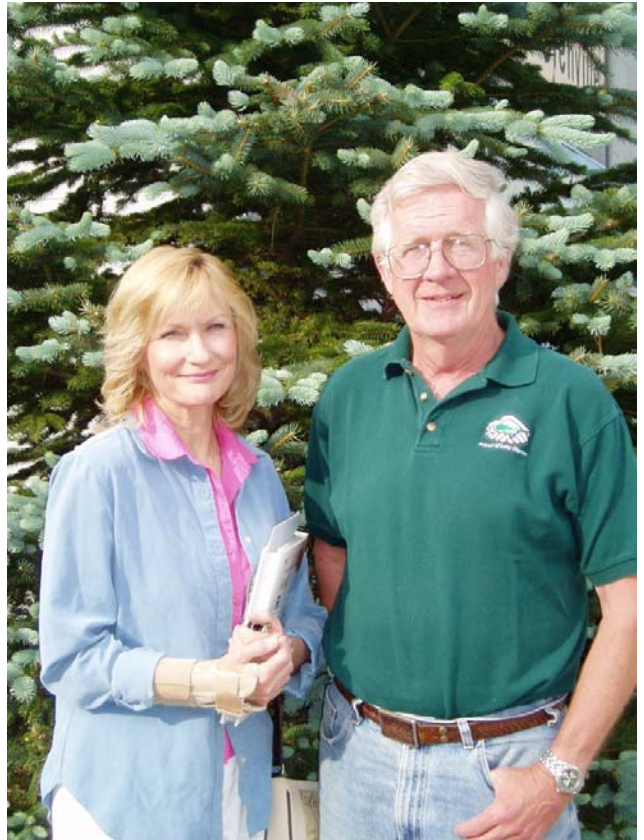

The flow of relicensing documents can be followed by accessing the FERC web site - ferc.gov To use this informational web site, it is necessary to use the Project Numbers – listed above. The project numbers have to be entered as P-xxxx.

Welcome to Our New FLG Board Members

Please welcome Dottie Ennis and Sandy Bishop to the Board of Directors of the *Friends of Lake Glenville*. Dottie will be taking over the Social Chairperson's job from Deedee Rietze who is enjoying a new grandchild in Louisville, and Sandy is assuming the task of Water Quality Chairperson from Keith Dixon who has stepped back to build his new house and enjoy his grandchildren too.

A native of Montgomery Alabama, Dottie is an interior designer and owned a home fashion and design retail firm in Montgomery before marrying Gary Ennis and moving to Tampa. Dottie and Gary bought a 130 year old farm house on Big Ridge Road five years ago, and, as Dottie says, "between working with clients, constant renovations on this wonderful old house, making new friends, and just being thrilled with these mountains...we seem to find our trips back to Florida further a part every year!" She is excited to be our new Social Chairperson and looks forward to meeting everyone at the next breakfast or on the lake.

Sandy is a retired academic veterinarian, having spent eight years on the faculty at Ohio State University and 25 years at the University of Alabama at Birmingham, the latter as a Professor of Pathology with a focus on training graduate and post-graduate students in experimental cardiovascular pathology. Since retiring in 1998, he and his wife Carol live in Cashiers full time where they are members of the *Episcopal Church of the Good Shepherd*. Sandy says he enjoys hiking, fly fishing, tennis, woodworking, spending time with his three children and five grandchildren, and "just living in God's little special area of the world". Sandy has already been helping obtain the water samples at the heart of the FLG Water Quality program and will now supervise the entire stream and lake testing program, after "training" by the founder of the program, Doug Odell, and his predecessor, Keith Dixon.

New Board members Dottie Ennis (above right) and Sandy Bishop (above left) at their first meeting May 16, 2004 at the Glenville CDC

Lake Clean Up 2004, continued

(Continued from page 1)

1. Congregate at the shoreline near the barge at the allotted times (see below); collect loose debris, then offload it onto the Duke barge which will be anchored near the shoreline (there will also be help on the barge). This will negate the need to have numerous boats trekking to the ramp on Pine Creek Road. The barge will do the bulk of the transport to the Ramp.

I believe it would be better if we all did #2 for the reasons given above, but we don't want to discourage participation if you'd rather just take the debris directly to the ramp. But **PLEASE strictly observe the rules as to what can and what cannot be removed.**

What Can and Cannot be Removed

Anything that can be loaded onto your boat can be collected, as long as it is not attached to the shoreline. Please bag all small trash either in the orange garbage bags provided or in any large plastic bag.

Any item (logs, trees, large scrub) that cannot be loaded onto your boat by two people should be tagged with a surveying flag (these will be handed out at the May 15th breakfast or can be picked up at the dock next to Buck Knob Landing on the morning of the clean-up, or can be purchased from a hardware store).

PLEASE DO NOT TOW ANYTHING TO THE BARGE OR TO THE RAMP ON PINECREEK ROAD. We will have no one capable of tying off or removing these large logs/trees. Dale Mosteller, who is the Lake Manager for Duke, will be on the lake two or three days prior to clean up and will be tagging logs and large floating trees for removal or tying securely to the shore. If you know of any such trees that are loose at the shore line and in danger of floating out into the lake, either tag them or call Dale on his cell at 828-506-2449 and he will take care of them. You can do this at any time, but certainly during the clean-up.

Please follow these guidelines closely because we do want to be good citizens and leave whatever brush we can in the lake for fish habitat.

How to Mark Hazardous Floating Material

As indicated above, if this material cannot be loaded onto your boat and then transferred to Duke's barge, please mark this material with the survey flags provided and bring them to the attention of Dale Mosteller on the Duke barge (see phone number above.)

The Barge Collection Locations

These are subject to change but as of now, the barge will be at the following locations during the morning:

8:00 am through 8:45 am—Near Small Island off Little Switzerland (We will collect debris from Trillium down to Hurricane Creek, on both sides of the lake)

9:00 am through 9:45 am—Off Tater Knob, next to the Pavilion at Buck Knob Landing (We will collect debris from Trillium up through Tater Knob, on both sides of the lake and around Buck Knob Island)

10:00 am through 10:45 am—Off the tiny island next to Fenley Forest (We will collect debris from Tater Knob around Still Point up to Admiral's Point on one side and into Norton Creek on the other side)

11:00 am through 11:45 am—Off the entrance to Mill Creek/ Strawberry Hill (We will collect debris from Bill Young's island up to and into Mill Creek)

12:00 am through 1:00 pm—Off the boat ramp at Ralph Andrews Park (We will collect debris from the entrance to Mill Creek up to the dam and into both Pine Creek and Sunset Cove)

Please let's all move up the lake clearing the debris in accordance with the above timetable. If the Hurricane Creek areas is not complete by 8:45 am, we will need to move to the next area, and so on. Please let's try to stay until 1pm so that the residents of Mill Creek and Sunset Cove, who have helped clean up Hurricane Creek etc, are not shortchanged.

If you miss the Barge at the Collection Point

Feel free to take the debris to the ramp on Pine Creek yourself or just wait for the return of the barge.

Lunch Location and Time

From 12 pm to 3pm at the Pavilion on Buck Knob Landing. PLEASE be sure to call Jackie Wertymer at 828-743-1116 by June 7th to confirm your attendance at the lunch. Leave your name and how many people will be coming. Feel free to come by boat or car.

Many thanks for helping out. I hope to see you all at the Pavilion for lunch after 1pm. Let's have an enjoyable morning!

*Must be *received* one month prior to Annual Meeting (this year July 7 2004), in order to vote at Annual Meeting August 7th 2004, per FLG By Laws.

Boating Safety Courses

David Leach, Boating Safety Director

As most of you know by now, in order to operate a personal watercraft on the waters of North Carolina, the N.C. General Statutes require that anyone between the age of 12 and 16 years of age must complete a NASBLA-approved Boating Education Course and carry a certification card and proof of age. Quite honestly, I recommend that we all take one of these Boating Safety courses from time to time just to refresh our memories on what the boating rules and etiquette are. I know I need it!

There are two ways to do this:

- Attend a Boating Certification Course in person
- Pass an on-line Certification Course

In both cases, do the following:

- Go to the website www.ncwildlife.org and check the Boating/Waterways bar on the left hand side

[For those who would rather navigate the site themselves, don't read any further; for those who would like a blow by blow, I have added step by step instructions below]

- Select Boating News from the top bar
- Select Register for a Boating Education Course on line

To register for the course in person:

- Go down to the Registration section under Instructor-Led Courses and select Jackson County from the pull down list and hit the *Request List* button.
- The list of current courses will appear—there are currently three, one on 5/27 at Cullowhee Fire Dept (828-293-3417), one on 6/1 at Dillsboro Rescue Squad (828-631-1988) and one in Glenville on 7/7 at the Glenville Rescue Squad (828-293-3417).
- If you wish to register, select the course and call the number given above to register

To Sit and, hopefully, Pass an On-Line Certification Course:

- Go to the bottom of the screen and select Boat-ed.com under OnLine Courses
- This will take you to the Boat-ed.com website where you can then study for the course and take it at your leisure for \$15 (the in-person course is free, provides personal attention and there is no exam). You must score 80% to pass and your certificate takes 5 to 7 days to arrive. There is no limit to how many times you can take it but you do have to pay each time!

I hope you enjoy the course, however you decide to take it, and I hope to see you all on the lake this year. Have a great Spring and Summer and happy, and safe, boating!

David Leach, Boating Safety Director
Contact: 828-743-1825 / 770-475-2155

Navigation obstacles in the lake have disappeared now that the lake has come up. Can you identify them and remember them next fall or winter if you are out boating then?

Left: A submerged rock going south just before Hurricane Falls near the eastern shore, marked by a tethered buoy. Right: A sandy isthmus between the western shoreline and the large island south of the marina (looking north).

Relicensing Legal FundKick-off a Win-Win, continued

(Continued from page 1)

ation that sleeps 8, have donated a 2-night/3-day stay at the winner's choice of either property. The second prize is a state-of-the-art piece of electronic equipment anonymously donated to the campaign. For every \$100 contributed, the donors name will be entered in the drawing. \$1,000 contributors will have 10 chances, \$500 contributors, 5 chances and so on...the greater the contribution the more chances to win! The winner's name will be drawn at the September 18th Breakfast.

Steering Committee member Howard Austin created the \$50,000 goal graphic displayed at the Breakfast. The poster will be updated and displayed at each breakfast event. Jackie Cochrane, also a member of the Steering Committee, along with Skip Cochrane, handled the balloon operation for the kick-off activities.

Contributing to the Relicensing Legal Fund truly is a "Win-Win" situation. Friends of Lake Glenville is enabled to fund the intervention to the Duke Relicensing Application to insure that our lake interests are met, and certain lucky contributors are going to enjoy a glorious winter vacation on the beach at Amelia Island or a state-of-the-art piece of electronics for their home.

THE DUKE-NANTAHALA RELICENSING CASE:

A FIVE-MINUTE UPDATE

[THE FOLLOWING SUMMARY OF THE LEGAL PROGRESS IN OUR INTERVENTION TO THE DUKE POWER RELICENSING APPLICATION IS PROVIDED BY PHILLIP MARSTON WASHINGTON D.C. ASSOCIATE TO OUR LEAD ATTORNEY, MIKE BUTLER.]

Where are we?
Where do we go from here?

I. Status of the Application: "Filed" with FERC, but not yet "accepted for filing"

On January 26, 2004, Duke filed its re-licensing application (Application) with the Federal Energy Regulatory Commission (FERC), approximately three weeks after it had filed an offer of settlement signed by a number of interested organizations. Friends of Lake Glenville, of course, decide not sign the proposed settlement and will be contesting it before the FERC. The docket number of the Application, which is the key to tracking developments at the FERC, is P-2686.

FERC issued a notice of the Application and invited any comments on additional studies that should be done before the application can be deemed "accepted" for filing and hence before the FERC begins its actual review of the merits of the terms and conditions of the requested new license.

In response, the Friends of Lake Glenville intervened in the proceeding in late March, making the group a "party" to the proceeding. At this early stage in the proceeding, there was no need to go into detail on the substantive objections to Duke's application, but merely to state the group's general interest (in order to support its intervention) and to urge a number of additional studies to be done at Duke's expense to buttress certain

aspects of the record.

Jackson County has also moved to intervene and has already voiced vigorous objections to the procedures used to produce the offer of settlement.

II. Where do we go from here?

The FERC is reviewing the comments filed in late March (by us as well as by Jackson County). FERC is expected to issue a notice in the coming weeks that will probably focus solely on any additional studies required to complete the application and, if it concludes that the application is complete, will accept the Application for filing and set a deadline for interventions by any interested member of the public. That filing deadline will probably be about three weeks after the Commission notice. At that point, any other interested persons may file a protest, an intervention or other comment.

We anticipate voicing our substantive concerns (detailed below) in response to that notice.

Question: Can individual members of the public voice their concerns without becoming a party?

Answer: Absolutely. Letters may be addressed to the Commission's Secretary, referencing the project number P-2686. Letters may be addressed to the Chairman or other Commissioners as well, but as a practical matter, unless there is a large number of them (say, over 50), they are likely to be simply forwarded to the Secretary's office for filing. They will, however, become part of the record in the proceeding and will be read by the Commission staff.

The social side of Friends Of Lake Glenville started years ago with the Sundowner, an evening event at The Landings at Trillium centered around the 4th of July weekend in hopes that more members would be in town. The setting was beautiful, being right on the water, and it was a great social hour that drew people from all around the lake. Old friends got reacquainted and new friendships were formed.

The advent of the monthly breakfasts has really gained in its appeal over the years. What started at Haps with about 25 people grew to 60-80 people in attendance in 2002 and an average of 50 people at each breakfast in 2003. We've attracted many new members as we began to have brief meetings at the breakfasts to talk about issues of concern to all property owners. Now everyone knows that they can come have a great breakfast, visit with friends, here what the FLG board and volunteers have been working on, voice their opinions and concerns, and still have a full day to enjoy our beautiful mountains. People getting to know people and working together for the betterment of our lake and properties is what we are striving for. We have volunteers routinely taking water quality samples to ensure that the quality of our water remains pristine. Many others have gotten actively involved in our lake clean up day and still others have gone to countless meetings on relicensing. Each volunteer makes a difference on our lake and is greatly valued. Our social times allow us a great way to connect.

Who knows what other great events might be planned in the future.

[Editor's Note: The material below was written for the Winter 2004 newsletter and inadvertently not published in its entirety. The Editor regrets the omission and includes it here below.]

What a great season we had in the mountains this year. The Chopping Block and Trillium took really good care of us for our breakfasts with a good turn out of folks for each event.

Many thanks to the gals who volunteered to help call everyone for the breakfasts. Your friendly voice encouraged many new faces to join us. You were good listening ears as some shared concerns on the lake. Your caller lists with address and phone corrections have really helped us keep our records more current. The bottom line – YOU ARE VERY SPECIAL and I am extremely grateful for the time you invested to make each breakfast a success. So..... Please take a bow:

Patti Hicks	Lynn Leach
Marjjean Wallingford	Jackie Wertymer
Margaret McRae	Helen Cook
Sharon Wadsworth	Jackie Cochran
Patti Hampton	Barbara Moore
Pat Becherer	Dee Coates
Karen Scarbrough	Kerry Stanger
Sandi Eichhorn	Peggy Mohler

I am also most grateful to Patti Hicks, Lynn Leach and JoAnn Lindquist who so graciously filled in for me when I couldn't be there because of being in Kentucky on "grandbaby alert". You all went above and beyond and made everything flow so smoothly.

It seemed sad to me that we had to cancel the Sundowner this year when we had such a great evening planned, but due to insufficient advanced reservations it was necessary. Is it time to put the Sundowner, as an event, to rest? I'd love your input. The suggestions, from the surveys, we received indicated that most people wanted something more casual and away from 4th of July weekend – possibly a B-B-Que at Andrews Park pavilion on a Sunday afternoon. (We have found we would not be

able to serve beer or liquor there.) What about a hoe down? Any takers? Any event we may desire to have at Trillium would have to be on a Sunday or Monday evening.

Are the breakfasts alone serving the purpose of getting us together with friends and neighbors to socialize and share some lake business or would you still like one other strictly social event? The votes are being tabulated. Let's hear from you soon, as we are in the planning stages now for next year. Each of you that participate are the ones that make these events so special so please email your thoughts to the FLG email address.

[A proposed schedule of events for 2004 is omitted to avoid confusion with the current schedule.]

Patti Hampton did a super job of ordering fun, fresh, new items for our members to purchase at reasonable prices. The visors, golf towels, totes and new design ladies golf shirts were especially hot items. New colors and styles in sweat-shirts, windbreakers and men's golf shirts added much to the selections this year. It's a lot of work. A big thanks to Patti and her helper Gif for making us look so good in our new fashions.

A huge thanks to Karen Scarbrough and John Chafee for donating clear tubs for hauling all the clothes. Karen spent hours organizing, labeling and inventorying all of the items. What a Job! We are so very grateful and excited to be starting out next season so organized.

Karen and Patti will make a great team next year.

See you all in the spring when the mountains start calling us back home.

Nominating Committee Appointed

President Carol Adams recently announced members of the 2004 Nominating Committee. This committee will present the nominees for the 2004-2005 Board of Directors at the annual meeting on August 7. The Nominating Committee members are **Carol Adams, Doug Odell, Phil Fowler, Joanne Lindquist and Lynn Leach**. Members who wish to volunteer themselves or suggest others for Board positions may call any of the committee members.

Post Office Garden Ready To Bloom

Thanks to **Gena Luck** and her small but industrious committee the FLG Post Office garden project is a year 'round reality. Gena has seen to it that the seasonal plantings are completed and maintained in addition to caring for the soil and and general health of the plot. Steve at *Signworks* in Cashiers designed and installed the sign that identifies FLG as the contributors to this pleasant improvement to the community. Gardener members are invited to join the Post Office Planting Committee by calling Gena at 828 507-8138

Water Quality

Thanks to our water sampling volunteers, samples from the five major inflows plus two other sites have been collected and taken to the Ashville Lab each month during the fall, winter and spring months. It's wonderful to have such dedicated volunteers. The Lab results have been received by e-mail. And, each month, the results are reviewed for consistency and deviations. Fortunately we seldom see significant changes.

It is always refreshing to see the monthly results that show the water quality of our inflowing stream remaining typical for mountain streams and also remaining consistent. The noted fluctuations are usually due to larger rain and snow runoff.

[Editor's Note: In my first issue as newsletter editor some years ago, I published a photo of myself in my old kayak, hoping my lake neighbors would stop me and introduce themselves and maybe even offer me some news tidbits or an idea for an article. This still holds true, except now you need to look for a bright yellow new kayak. My other hope is that more of you will discover the joys of non-motorized travel on the lake, gliding noiselessly into coves to see nature up close or enjoying the solitude of a late fall or winter day when most power boats are in storage and you have the lake to yourself.]
